

POLICY ON GREEN CAMPUS

The Clean and Green Campus Policy at Sir Isaac Newton College of Engineering and Technology is a dedicated initiative fostering environmental sustainability. Our mission is to cultivate ecological awareness, minimize polluting product usage, and promote cleanliness for a healthy life. We strive to engage students and staff through various activities, creating awareness about pressing environmental issues. This policy embodies our commitment to a future characterized by sustainability, freedom from pollution, and overall well-being. Through education, conscious consumption, and community involvement, we aim to contribute actively to safeguarding the Earth for present and future generations.

Initiatives Taken:

1. Landscaping of Trees and Plants:

- Regular tree plantation drives are organized by the NSS, NCC, and science departments.
- The institution has more plants and we encourage students to plant more trees.

2. Ban on Single-Use Plastic:

- Complete prohibition of single-use plastics on campus.

3. Restricted Entry for Vehicles

- Restrictions have been placed on the use of vehicles in the campus area.

4. Environmental Awareness Events:

- Observance of various environmental days with events and campaigns.
- Promotion of environmental consciousness through rallies, seminars, and workshops.

5. Herbal Garden

- Implementation and maintain the herbal plants more on our college campus.

6. Pedestrian Pathways:

- A proper pedestrian path was maintained at the college entrance.
